

Andrew C.-H. Sue is currently a professor at the College of Chemistry & Chemical Engineering at Xiamen University, P. R. China. He received B.Sc. and M.Sc. degrees from National Chiao-Tung University, Taiwan in 2002 and 2004, respectively; and he obtained his Ph.D. degree from the University of California Los Angeles, USA in 2011 under the supervision of Sir Fraser Stoddart. After conducting postdoctoral research at the University of California Berkeley, USA with Professor Omar Yaghi, he started his independent career in 2015 at the Institute for Molecular Design and Synthesis, Tianjin University.

The research theme of the A. C.-H. Sue group ranges across supramolecular and macrocyclic chemistry, five-fold symmetry, crystal engineering, dynamic stereochemistry, and organic-inorganic hybrid materials.
