DIPARTIMENTO DI CHIMICA,  
MATERIALI E INGEGNERIA CHIMICA  
GIULIO NATTA

# Sezione di Ingegneria Chimica

CHIMICA INDUSTRIALE

coordinatore triennio 2020-22

Alessio Frassoldati

# COMPOSIZIONE

# COMPOSIZIONE

- 34 componenti (gender balance F/M =  $\frac{1}{4}$ )
- 9 Ricercatori (RTI, RTDB, RTDA) +1 a breve
- 13 Prof. Associati
- 12 Prof. Ordinari

# MISSIONE

- Condurre ricerca perseguiendo l'eccellenza nella ricerca e promuovendo il ruolo centrale dell'**ing. chimica** in tutte le nuove tecnologie che comportano trasformazioni della materia e dell'energia.
- Formare studenti e dottorandi.
- Contribuire allo sviluppo del Paese attraverso il trasferimento tecnologico.

La Sezione è attiva nelle **tree aree strategiche** per il Dipartimento:

- Energy, Safety and Environment
- Health and Life Sciences
- Smart and Sustainable Industry

# ATTIVITA' SCIENTIFICA: analisi degli ultimi 5 anni

Numero pubblicazioni media/anno = 275

H-index medio Sezione 25.5

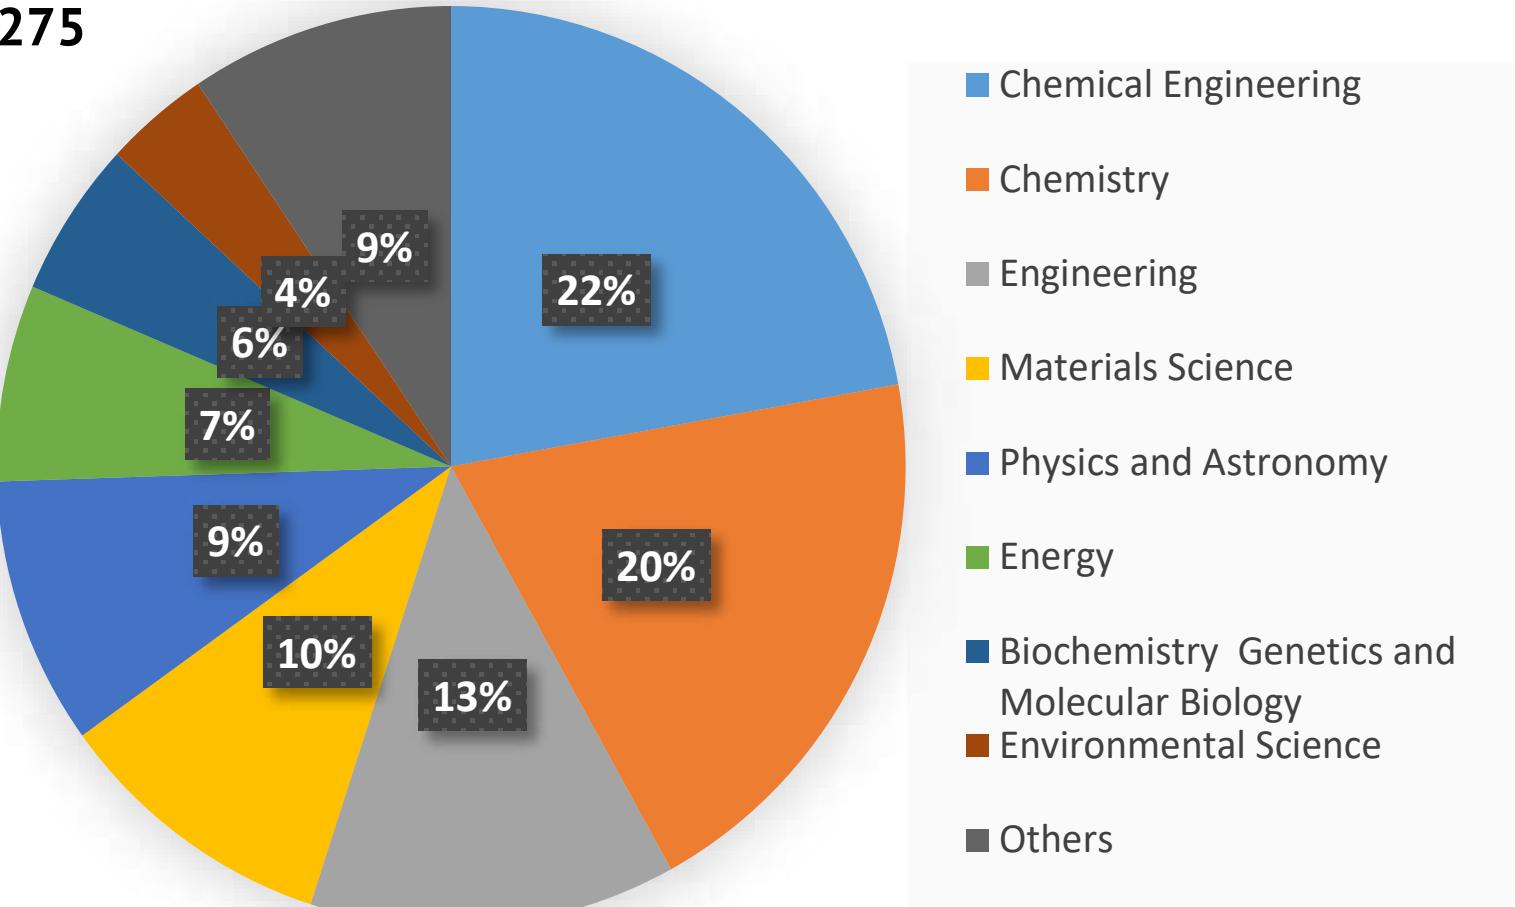

RTD/RTI 14.7

PA

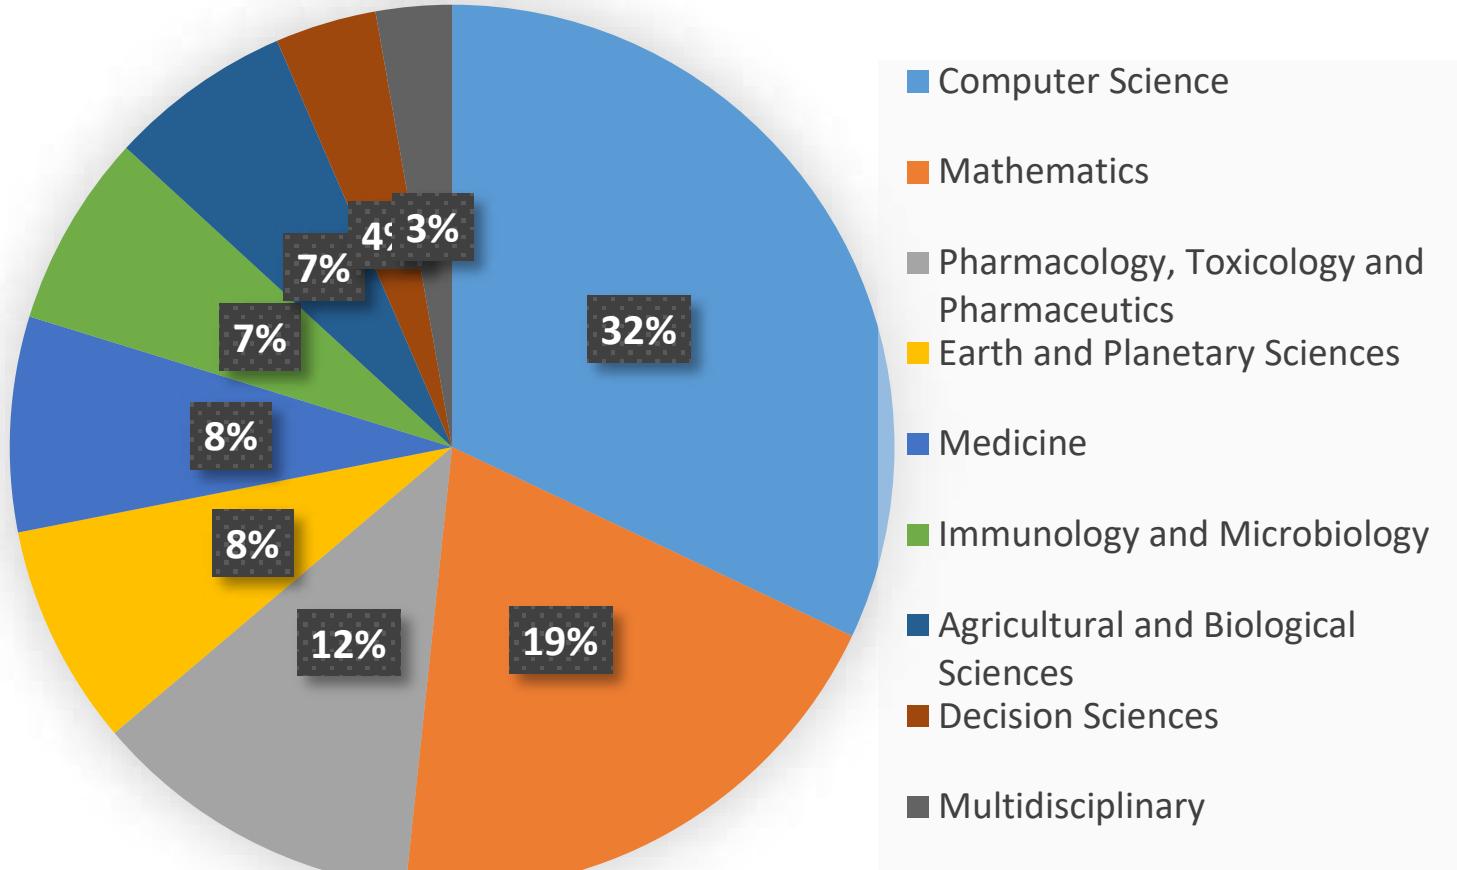

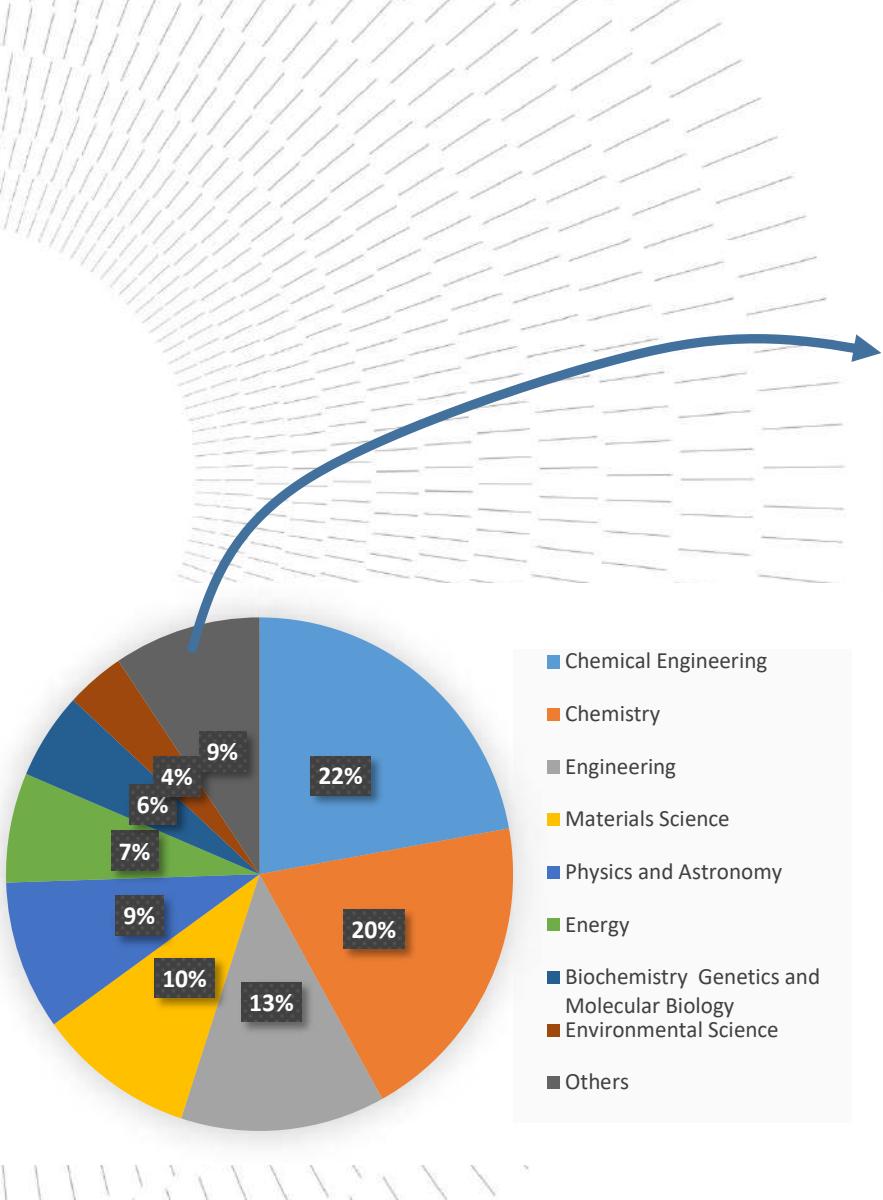

23.6

PO

34.8

# ATTIVITA' SCIENTIFICA: analisi degli ultimi 5 anni

# ATTIVITA' RICERCA: gruppi ricerca coinvolti

## **AOCL**

*Applied Organic Chemistry Laboratory*

## **CFALab**

*Laboratorio di Chimica Fisica Applicata*

## **CRECK**

*Chemical Reaction Engineering and Chemical Kinetics*

## **eRAM Lab**

*Experimental Risk Assessment and Management Lab*

## **Fluoritech**

*Fluoritech Laboratory*

## **GASP**

*Group on Advanced Separation Processes & GAS Processing*

## **Olfattometrico**

*Laboratorio Olfattometrico*

## **PSE-LAB**

*Process Systems Engineering Laboratory*

## **SEE lab**

*Surface and Electrochemical Engineering Laboratory*

## **Soft Matter**

*Laboratorio Soft Matter*

## **SuPER TEAM**

*Sustainable Process Engineering Research Team*

# **Interazioni con le altre Sezioni**

# ATTIVITA' RICERCA: 4 laboratori interdipartimentali coinvolti

## CFDHub@Polimi

*Laboratorio di fluidodinamica computazionale*

## NanoMedLab

*Laboratorio interdipartimentale di Nanomedicina*

## Laboratorio di Modellazione Molecolare

*Laboratorio interdipartimentale di Modellazione  
Molecolare*

## MEMS&3D

*Laboratorio interdipartimentale MEMS&3D*

# ATTIVITA' RICERCA e TRASFERIMENTO TECNOLOGICO

3 M€/anno per la Sezione (media ultimi 5 anni)

# ATTIVITA' RICERCA: temi

Renewable energy

Colloids

Soft Matter

Odour science

Polymer Reaction Engineering

Molecular modeling

Nanomedicine

Applied thermodynamics

Plastic waste recycling

CO<sub>2</sub> capture, utilization and storage

Advanced Separation Processes

(Bio)Pharmaceutical Engineering

Hydrogen and energy carriers

Energy Storage and Fluorine Chemistry

Pollutant abatement & reduction

Process systems engineering

Energy, Safety & Environment

Drug delivery

CFD of reactive flows

Clean Combustion

Process control

Sustainable process engineering

Molecular Scale

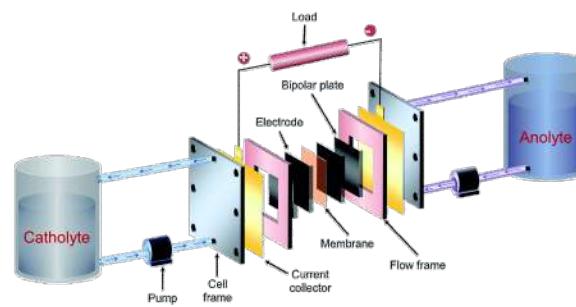

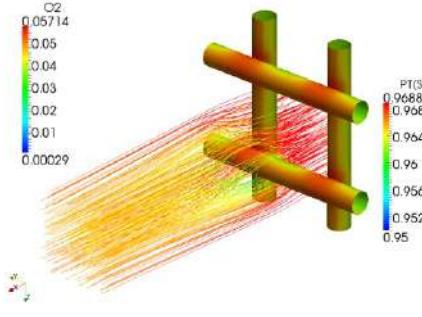

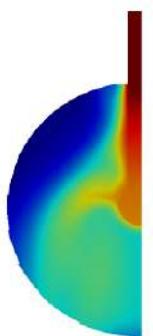

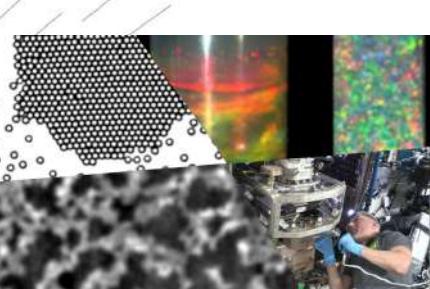

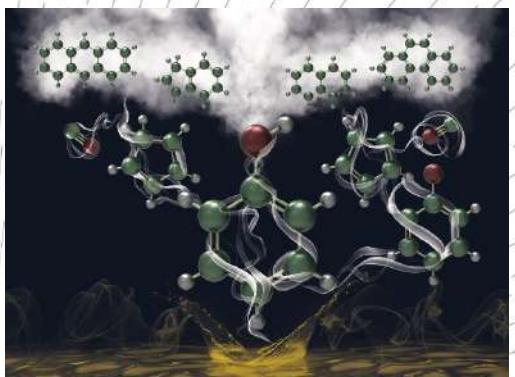

Nano-Scale

Micro-Scale

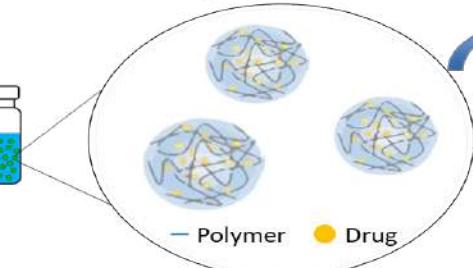

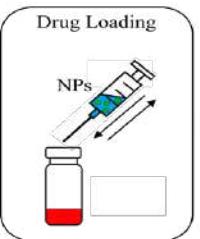

Meso-Scale

Macro-Scale

Mega-Scale

### Drug Formulation and Controlled Delivery

- Energy, Safety and Environment
- Health and Life Sciences
- Smart and Sustainable Industry

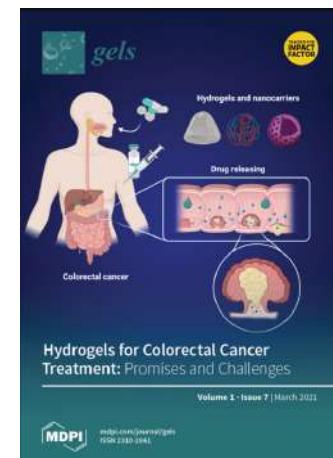

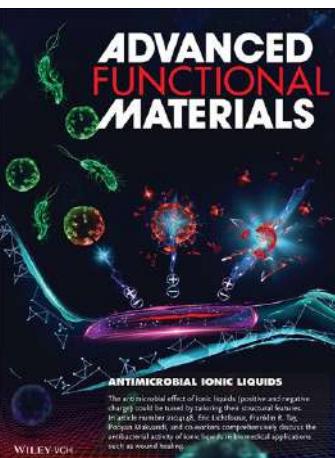

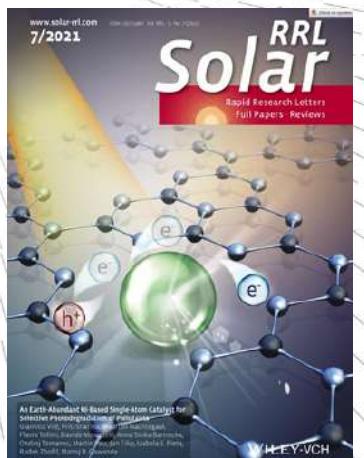

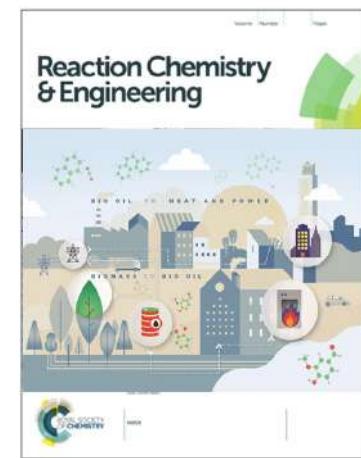

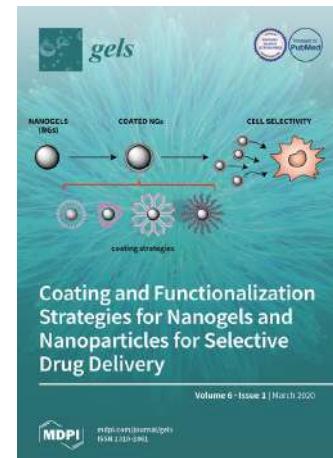

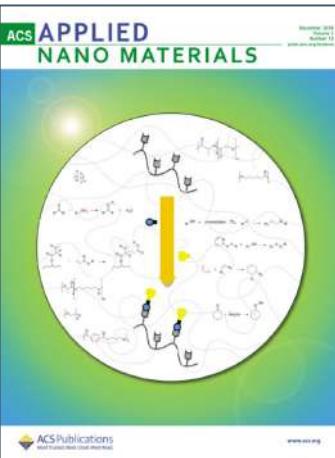

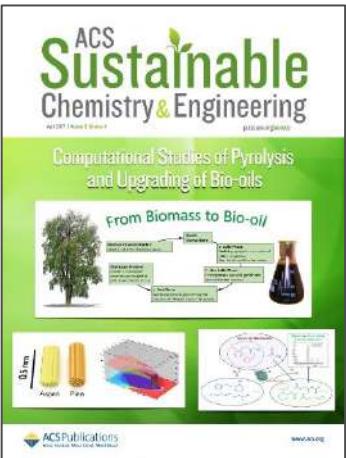

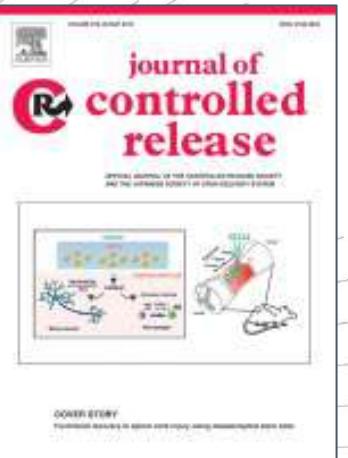

Attività sperimentale e di modellazione

Fenomeni di trasporto  
Cinetica chimica  
Termodinamica  
Sistemi multifase

...

# COVERS: 11+

## HONORS AND AWARD

2021 Emerging Investigator 2021 «Reaction Chemistry & Engineering»

2020 IJMS Young Investigator Award; award from International Journal of Molecular Sciences

2020 Research Excellence Award. Awarded by the Combustion Institute.

2020 Humboldt Research Fellowship for Experienced Researcher.

2020 premio Felder per chimica in flusso

2019 Fellow of the Global Young Academy (GYA);

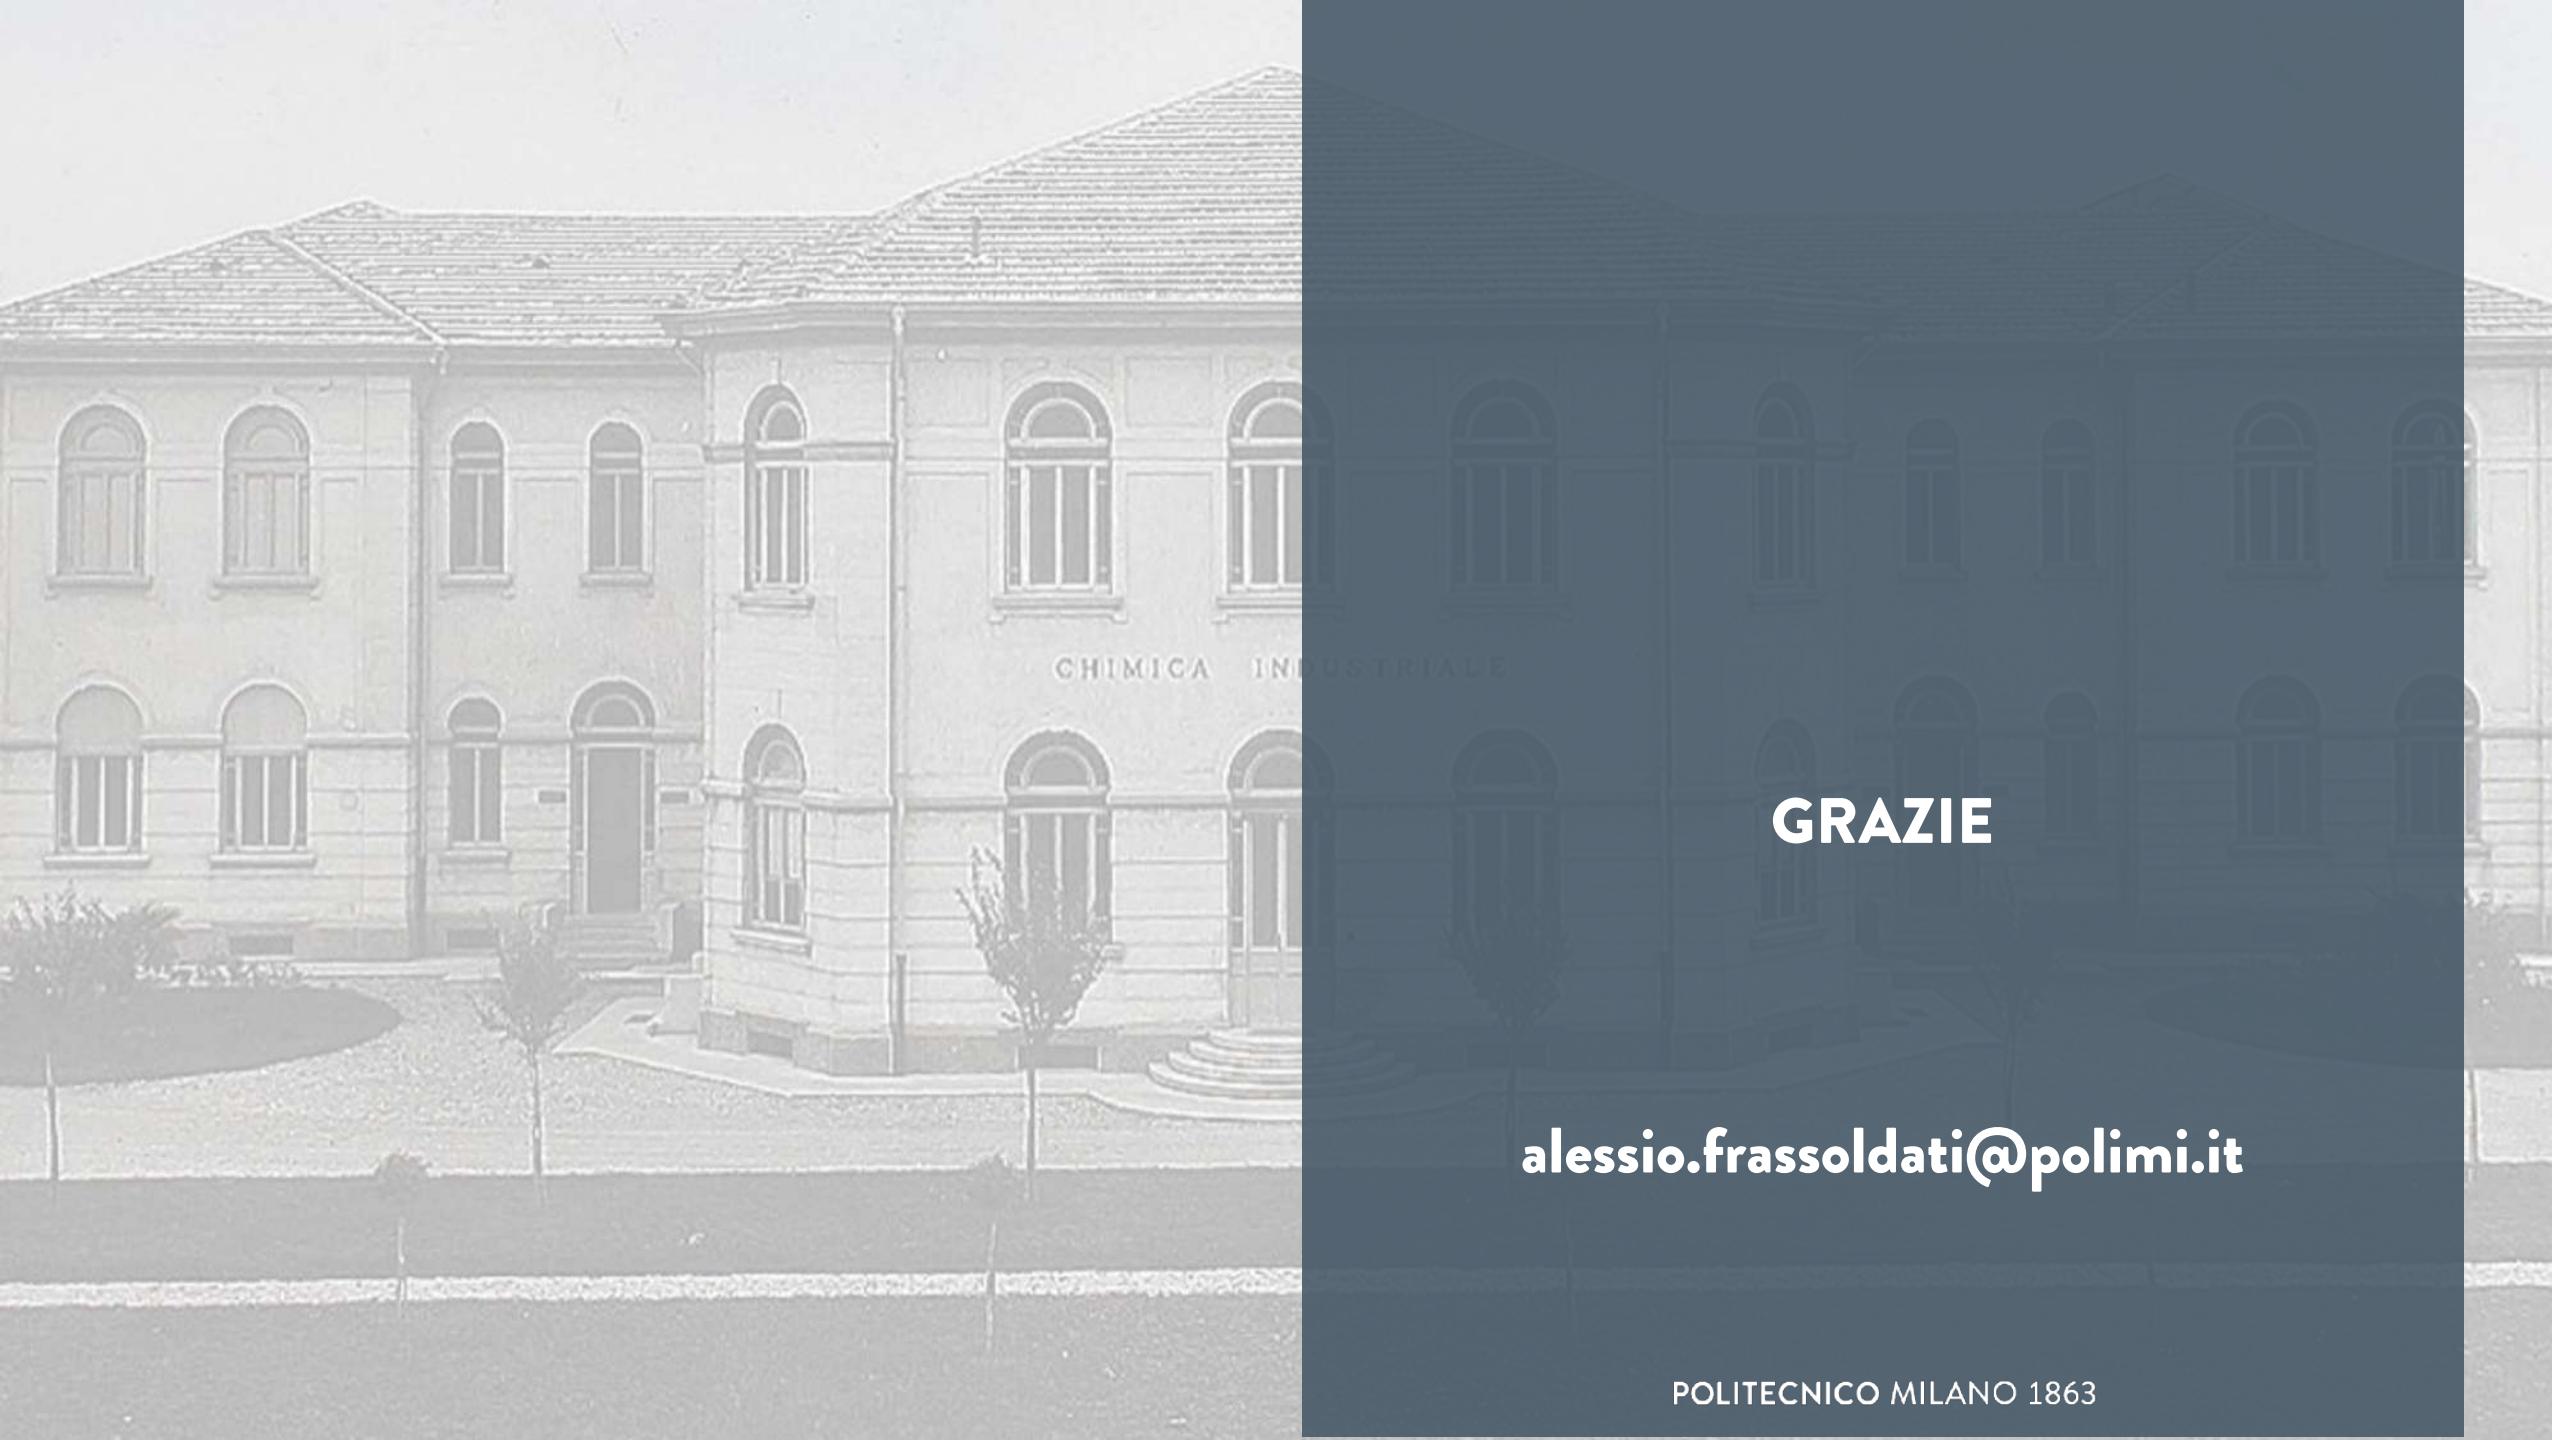

2019 Fellow of the Combustion Institute

2019, New Delhi, India – Dr. R.A. Mashelkar Golden Medal for the contribution on CO<sub>2</sub> utilization

*Rapidly expanding intersections of a wide range of areas of science with engineering are the new Frontiers in Chemical Engineering. Many of the most interesting and fruitful challenges at the frontiers of chemical engineering involve the integration of chemical engineering with chemistry, physics and biology [...]*

*Gil Garnier, “Grand challenges in chemical engineering”  
Front. Chem., 2014*

modeling storage pollutant nanoparticles process polymer processes engineering safety energy nanomedicine sustainable biomass capture dispersion reactive optimization delivery combustion odour batteries recycling synthesis chemistry reaction explosions phase thermodynamics waste drug biopolymers risk
